14. ABSTRACT The 1999 Active Duty Surveys (ADS) gather information on military assignments, retention issues, personal and military background, preparedness, mobilizations and deployments, family composition, use of military programs and services, housing, perceptions of military life, family and child care concerns, spouse employment, financial information, and other quality of life issues. Information derived from the survey will be used to assess military personnel issues for Service members and their families. This report presents tabulations for Service members as a whole and for subgroups defined by Service, paygrade category, gender, and location. Volume 1 of the tabulations covers the first three sections of the survey; Volume 2 of the tabulations covers the remaining four sections of the survey.

Acknowledgments

DMDC is indebted to numerous people for their assistance in the design of these surveys. In the initial design stage, we convened a group of subject matter experts within the Office of the Under Secretary of Defense for Personnel and Readiness to discuss desirable elements for the survey. Those who participated had the opportunity later to review and provide comments on the survey outline developed at the meeting as well as throughout the design phase. We also wish to thank the General Accounting Office (GAO) who assisted in the conduct of pretests and offered helpful suggestions as the instrument underwent revisions. Among those contributing were Jack Edwards, John Pendleton, Kurt Burgeson, and William Buesse. We especially thank Edward Akers (Consortium Research Fellows Program), Tanya Guthrie, Robert O. Simmons, and Jacqueline Scarville (Defense Manpower Data Center) for facilitating pretests and helping with question design.

Data collection and dataset preparation for the *1999 Survey of Active Duty Personnel (Form A)*, and the *1999 Survey of Spouses of Active Duty Personnel (Form B)* were performed by Data Recognition Corporation (DRC) under contract DASW01-98-C-0062. Contributing staff at DRC in the Survey Division include the Federal Government Team (Mary Latta, Heidi Koelker, Dawn Nelson, Michelle Tostenson, and Mary Ellen Hartmann). They were supported at DRC by the staffs of Comment Processing, the Call Center, Survey Operations, Clerical Operations, Print Services, Inserting, and Warehousing.

Data processing and production of these tabulation volumes were performed by Westat under contract M67004-98-D-0002/001.1. Contributing staff at Westat include Beth MacDougall and Katie Hubbell. They were supported at Westat by Dawn Williams, Brad Johnson and David Rockwell.

Many people contributed to the review of this report. We are grateful to Rachel Noble and Elizabeth J. Willis (Consortium Fellows Program) for their attention to detail.

1999 SURVEY OF ACTIVE DUTY PERSONNEL: TABULATIONS OF RESPONSES, VOLUMES 1 & 2

Preface

The 1999 Active Duty Surveys (ADS) continues a line of research begun in 1969 with a series of small-scale surveys administered approximately every two years. These surveys were expanded in 1978 to provide policymakers with information about the total population directly involved with active duty military life (Doering et al., 1981). The Department of Defense (DoD) also conducted large-scale active-duty surveys in 1985 (Hunt et al., 1986) and 1992 (Westat, 1993, 1994a, 1994b). The 1999 ADS are a set of mail surveys sponsored by the Office of the Assistant Secretary of Defense for Force Management Policy (OASD[FMP]) with particular interest in analysis by the Offices of the Deputy Assistant Secretaries of Defense for Military Community and Family Policy (ODASD[MCFP]) and for Military Personnel Policy (ODASD[MPP]).

There are two 1999 ADS instruments: the *1999 Survey of Active Duty Personnel (Form A)*, and the *1999 Survey of Spouses of Active Duty Personnel (Form B)*. Members' responses to *Form A* are provided in two volumes (Gaines et al., 2000a, 2000b). Spouses' responses to *Form B* will be presented in later volumes (Deak et al., in preparation a, in preparation b). Tabulation volumes were also done for the 1985 surveys (Griffith et al., 1986a, 1986b, 1986c; LaVange et al., 1986a, 1986b, 1986c).

Survey Methodology

Survey Design

Both *Form A* and *Form B* are constructed around a core of questions comparable to those used in previous surveys of DoD members, particularly the *1992 DoD Surveys of Officers and Enlisted Personnel and Their Spouses*. The questionnaires focus on the experiences, attitudes, and demographic characteristics of active duty members and their spouses. Like their predecessors, the 1999 ADS were designed to provide timely, policy-relevant information on the military life cycle (Wright, Williams, & Willis, 2000a, 2000b). These surveys also provide information on the impact of military policies on the family, career intent, and factors affecting readiness, among other topics.

A copy of the 20-page, 112-question (some with multiple items) *Form A* questionnaire is provided in the Appendix. The survey instrument can be grouped into seven sections:

- *Assignment Information* – includes questions on hours worked, permanent duty station (PDS), satisfaction with characteristics of the PDS, permanent change of station moves, and time away from the PDS for military duties;
- *Career Information* – includes questions on career intent, reasons for joining, obligation and retention, satisfaction with occupational specialty, and satisfaction with aspects of military service;
- *Military Life* – includes questions on importance of military activities, thoughts of leaving the military, civilian vs. military opportunities, and overall satisfaction;
- *Programs and Services* – includes questions on the availability and use of on-base and off-base services, facilities, and programs;
- *Family Information* – includes questions on marital status, spouse occupation and education, dependents, childcare arrangements, and military health care;
- *Economic Issues* – includes questions on non-military income, total monthly income and expenses, savings and debt service, and retirement benefits; and
- *Background* – includes information on gender, race/ethnic status, education, duty status, Service, paygrade, and time served.

Volume 1 of the tabulations covers the first three sections of the survey; Volume 2 of the tabulations covers the remaining four sections of the survey.

Sample Design

The population of interest for *Form A* consisted of active-duty Army, Navy, Marine Corps, Air Force, and Coast Guard members (including Reservists on active duty) below the rank of admiral or general, with at least 6 months of service at the time of survey mailings. The sample frame included only those members who were on active duty in May 1999, with eligibility conditional on also being on active duty in September 1999. Complete details of the survey development, administration, and dataset creation are reported by Wright, Williams, and Willis (2000).

The initial sample consisted of 66,040 members. A total of 33,189 eligible military members returned usable surveys. This represents an adjusted weighted response rate of 51%, which is typical for large-scale surveys of DoD military personnel. The data were weighted to represent the military population as of 30 September 1999, at the start of data collection. Complete details of response rates and weighting are reported in Flores-Cervantes and Valliant (in preparation).

Survey Administration

The survey forms were administered separately to stratified random samples of active duty members and spouses of active-duty military members. Data were collected by mail with procedures designed to maximize response rates. Beginning in late August 1999, an introductory letter explaining the survey and soliciting cooperation was sent to members. The introductory letter was followed about 3 weeks later by a package containing the questionnaire and instructions for completing and returning the survey. A third letter was sent to thank individuals who had already returned the questionnaire and to ask those who had not completed and returned the survey to do so. At approximately 3 weeks, 6 weeks, and 9 weeks after the initial survey mailing, second, third, and fourth questionnaires with letters stressing the importance of the survey were mailed to individuals who had not responded to previous mailings. The field closed on 4 January 2000 with all surveys received by that date.

Analytic Procedures

Estimation Procedures

The 1999 ADS used a complex sample design that required weighting to produce population estimates. This weighting means that standard statistical software packages may be inappropriate for computing standard errors,

variances, or tests of statistical significance. For this report, variance estimates were calculated using WesVar¹, a software application specifically designed to provide valid statistical estimates for complex surveys. WesVar uses replication methods for variance estimation.²

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the random variation around population parameters such as a percentage or mean. Estimates in these tabulations are percentages and are reported with 95% confidence intervals.

Percentages in these tabulations have Wilson upper/lower limit confidence intervals, which are asymmetric (Wilson, 1927; Newcombe, 1988). The Wilson confidence interval sets a lower bound of 0% and an upper bound of 100%. This means that, if the lower symmetric confidence interval for a small percentage would normally include a negative number, the lower Wilson confidence interval cannot go below 0. Likewise, if the upper symmetric confidence interval for a large percentage would exceed 100% using the standard approach, the Wilson method limits the upper interval to 100.

Subgroups

Survey are tabulated in these reports for Service members as a whole and for subgroups defined by Service, paygrade category, gender, and location. Analyses assigned respondents to categories within subgroups primarily through answers provided on the survey. In the case of missing data, category assignments were completed using administrative records where possible.

Subgroups were constructed as follows:

- **Service** is defined by the response to Q108, "In what Service are you?" Based on responses, members are assigned to one of five categories: Army, Navy, Marine Corps, Air Force, or Coast Guard.

¹ WesVar[®] is a registered trademark of Westat, Rockville, MD, USA.

² Replication is an empirical method of establishing sample variation by drawing repeated subsamples from the obtained sample and comparing results to those obtained for the full sample. This empirical calculation of variance is in line with the theory of sample variation, which draws upon the concept of creating repeated samples to establish confidence intervals. Replication methodology produces variance estimates very close to those produced using Taylor series linearization methodology, the main alternate method of variance estimation.

- Paygrade is based on Q109, "What is your current paygrade?" The original 20 categories are collapsed to seven for analyses: E1-E3; E4; E5-E6; E7-E9; W1-W5; O1-O3; and O4-O6.
- Gender is obtained from Q101, "Are you: (1) Male (2) Female," and is coded accordingly.
- Location is defined by responses to Q5, "Where is your permanent duty station located?" Members were assigned to one of two categories: *In one of the 50 States or the District of Columbia or In American Samoa, Guam, U.S. Virgin Islands, Puerto Rico, or Overseas.*

Data Suppression

Unstable estimates in table cells were suppressed or annotated.

Estimates may be unstable because of a small sample size for that cell or large variance in the data or weights. The following rules were used:

- A cell estimate was not published if the size of that cell was less than 30. These cells are annotated "NR" (Not Reported).
- A cell estimate was published with an asterisk if the responding cell size is 30 to 59.
- A cell estimate was published with an asterisk if the relative standard error for that estimate was greater than 30%.

99. Currently, military personnel do not qualify for retirement benefits unless they serve for at least 20 years. If the system were changed so that you became eligible after at least 10 years of service for a deferred pension payable at age 62, how much influence would this have on your willingness to stay in the military at least 10 years?

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 U.S.C. 136, 10 U.S.C. 1782 and 10 U.S.C. 2358

PRINCIPAL PURPOSE: Information collected in this survey will be used to assess attitudes and perceptions of military life. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies.

ROUTINE USES: Reports will be provided to the Secretaries of Defense and Transportation, and each Military Service. Findings will be used in reports and provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

THIS IS NOT A TEST, SO TAKE YOUR TIME.

SELECT ANSWERS THAT BEST FIT YOU.

MARK ONLY ONE ANSWER FOR EACH QUESTION
UNLESS THE QUESTION SAYS TO MARK ALL THAT APPLY.

- MAKE HEAVY BLACK MARKS THAT FILL THE RESPONSE CIRCLES.
- DO NOT MAKE ANY MARKS OUTSIDE OF THE RESPONSE CIRCLES OR WRITE-IN BOXES.
- IF YOU CHANGE YOUR MIND, ERASE OLD MARKS COMPLETELY.
- DO NOT USE INK, BALL-POINT, OR FELT TIP PENS.

A Thrift Savings Plan (TSP) is a tax-deferred retirement savings plan like a 401(k) plan.

- Employees may deposit a portion of their pay (typically up to 5 or 10 percent) before taxes into a long-term fund to provide savings for retirement.
- Employers may match none, some, or all of their employees' contributions.
- A wide range of investment options is generally available, including funds that follow the stock and bond markets.
- TSP funds may be taken to another employer or rolled over into other qualified retirement savings plans.
- Funds may begin to be withdrawn at around age 59½—earlier withdrawals are usually penalized.

97. If this type of plan were made available to you, how likely would you be to participate in each of the following situations?

	Very unlikely	Unlikely	Neither likely nor unlikely	Likely	Very likely
a. If there were no government matching	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
